

## Project Plan: Sogwa Solutions Website

### 1. Project Overview

- Goal: Build a modern, responsive website for Sogwa Solutions to showcase services, training, accreditations, gallery, and contact options.
  - Tech Stack: React (frontend), Material UI, Google Forms (contact), static assets.
- 

### 2. Key Pages & Features

- Home: Hero section, overview cards for training/services, navigation.
  - About: Company info, director profile, accreditations, sponsor.
  - Training: List of accredited courses, career opportunities, interactive cards.
  - Services: List of business services offered, enquiry links.
  - Gallery: Static gallery of service photos.
  - Contact: Embedded Google Form, location map, contact details.
  - Footer: Centralized, with contact info and accreditation logos.
- 

### 3. Design & Branding

- Use company logo and colors.
  - Consistent layout and navigation.
  - Responsive design for mobile and desktop.
- 

### 4. Development Steps

1. Set up React project structure.
2. Create and style Navbar and Footer.
3. Develop each page:

- Home (hero, cards with background images, navigation)
  - About (info, director, accreditations)
  - Training (static data, interactive cards)
  - Services (static data, enquiry links)
  - Gallery (static images)
  - Contact (Google Form embed, map)
4. Add assets: Logos, service images, accreditation images.
  5. Implement routing and scroll-to-top behavior.
  6. Test responsiveness and accessibility.
  7. Deploy to hosting (Hosting Service To be Confirm).

---

#### 5. Developer & Stakeholder Information

- Website Developer: MC Mashimbyi
- Project Director: MV Djofang
- Stakeholder: Sogwa Solutions

---

#### Deliverable:

A professional, easy-to-navigate website that highlights Sogwa Solutions' offerings and accreditations, with clear contact options for users.
